

## What is film costing you?

- \$ Materials
- \$ Lost film
- \$ Time
- \$ Storage
- \$ Square footage

RIS/PACS solutions have helped many hospitals to dramatically improve efficiency, reduce errors, and cut costs. There are plenty of vendors who have seen the industry moving from film to digital exams and have recently developed their own RIS/PACS software to take advantage of the market shift. However, not all RIS/PACS solutions are created equal.

Used in over 100 facilities nationwide, PRS' proven RIS/PACS solution provides the power of a truly integrated RIS and PACS system. Developed by our technology-partner Empiric Systems, PRS' integrated

RIS/PACS is an easy-to-use Tier-1 solution that combines usability, functionality, and reliability.

Built on a scalable and distributable .net web platform, PRS' RIS/PACS solution is designed for delivery on your private network, or over secure Internet connection.
